

Repository Report: Multi-Tier Service Agent Platform

Report Generated: November 23, 2025

1. Document Titles and Timestamps

- "Multi-tier service agent platform.docx" (Created and Modified July 31, 2024)
- Screenshots from November 23, 2025
- SHA-256 hashes from "hashes.txt" confirming forensic integrity

2. Purpose and Scope

A scalable, commission-based sales and training model designed to support digital marketing expansion through agentic workflows. The document outlines a three-tier commission structure, mentorship pathways, automation protocols, and national revenue projections.

3. Strategic Synthesis

- Three-tier commission structure with direct and override earnings
- Training and development pathway from agent to mentor
- Automation tools for CRM, order processing, and performance analytics
- Revenue and cost modeling for nationwide expansion using white-label services

4. Significance and Continuity

- Demonstrates evolution of agentic workflows foundational to the Shepherding Process
- Establishes prior art for scalable mentorship and automation logic
- Bridges operational containment with distributed training and incentive architecture
- Anchors continuity between service agent roles and AI-assisted shepherding logic

5. Validation and Authorship

- Timestamped document and screenshots
- SHA-256 hash manifest for forensic anchoring
- Authorship attribution to Spencer Southern

6. IP Posture

- Prior use claim
- Licensing obligations upon derivative use
- NDA-based access protocol
